Summary

I'm a developer who's genuinely fascinated by how networks function, and I specialize in using Python to make them run smarter. I enjoy tackling complex challenges like network optimization and pathing, applying my knowledge of algorithms, dynamic programming, and recursion to write scripts that find the most efficient solutions. I have a strong grasp of how core data structures are a perfect fit for networking—using queues to manage data flow, trees to build fast routing lookups, and linked lists to keep track of connections.

Education

2024 - Current	Bachelor of Science in Computer Science with specialization in Cyber Security and Forensics Undergraduate
2022 - 2024	Graduated from Senior Highschool with Honors

Certifications

Fundamentals of Dynamic Programming
Foundations of Algorithmic Thinking with Python
Python Data Structures: Trees
Python Data Structures: Stacks, Deques, and Queues
Python: Recursion
Transition from Java to Python
Python Data Structures: Linked Lists
Networking Basics
